

# MEAT BOX LINERS

**FSSC 22000 food safety accredited.**

The Food Safety Management System (FSMS) at PLASTIC PACKAGING is planned, implemented, controlled, and improved, considering the context of the organization as a set of interrelated processes in compliance with the requirements of the international standard ISO 22000:2018.

All food contact products are certified according to relevant European Union standards and migration tests.

Tailor-made printing and packaging solutions. If you need a packaging solution, we either already have one for you or we will develop it according to your specifications.

# STAR HOUSEBRAND UTILITY BAGS

Plastic packaging can survive extreme environments and don't easily degrade in hot and cold temperatures, thus preserving the integrity of the food or beverage inside it. It also protects your products from moisture, oxygen, dust, light and odours.
